

Hanami store :)

Hello folks! 🙋

✨ There is a village named **Hanamai** in which there is a famous clothing store which is owned by one of our clients named **Hanami**. Her clothing store is so famous that other villagers are also visiting the store to buy cloths. So, she decided to provide home delivery through an online platform through which the customers can order their favourite clothing from home, which also enhances their business growth. 😊

Therefore, **Hanami** wants to collaborate with Everest to build that online platform. 🤖 As a developer, you are requested to build that online platform based on the requirements provided by the client.

👉 Requirements:

Client wants to have a website which displays the clothings which are available/upcoming in her store. Find the below list of specific requirements from clients.

- There should be a logo of the store at the top left of the website(use your own logo)
- A search bar for searching items
- Cart symbol for going to cart section
- Logo, search bar and cart should be remain same even the page is scrolled
- Display all the items that are available in the store in homepage

- Show the items as cards and each card should contain:
 - Item image, Item name, Item price, Rating, badge for new items, availability.
- If the item is available, there should be a button(whishlist) to add the item to wishlist
- If the item is not available, there should be a button(Notify) to notify the user when available and the item image should be shown as per design

 As it is a new era of **Hanami's** business, she wants to sale some of the items with some percentage discount, so you need to display the items which are in sale at one place in the UI. And display the discount percentage on the item card.

 Note: no need to add any functionality to Wishlist, Notify, Search bar, Cart and Logo. Just add them to the UI. The UI need not be the same as in the provided design, it's just for your reference.

 Find the reference design below for more clear understanding of the requirements.
